Tuning to the vibrating energy of Shinkiko

Vol. 4

Until last month's issue, I have explained mainly about what sort of mind-set you should have in order to receive *Shinkiko* properly. This month, I am going to think about the universe, the source of *Shinkiko*, and explain my own view of it.

Progress is wanted on earth

The energy being emitted from people is still low and is far from harmoniousness: on the earth, there are still conflicts going on in some countries and also there are moves to prioritize the interest of some people. And we have a mountain of difficult problems, such as environmental problems, food problems and etc. But we have lived through ages, and have learnt many things while repeating big mistakes. We have been making an effort to reduce conflicts, to thrive, to live brightly and cleanly, to serve others, and to get rid of unwanted desires in order to live in peace with each other and to live feeling gratitude. Could we have made this progress without any guidance? I personally think that, as my father was always saying, "believe in god...", there must be this great, god-like existence that created the universe, and that it is always leading us to make a harmonious world. Men must still be so immature that they have to be aware of

their mistakes and learn many more things from them. I think that the god-like existence is hoping that we make more progress.

A "progress system" of the universe

Mankind has not yet recognized any life on other planets, but it is not that surprising if an earth-like planet exists somewhere, and we cannot deny the possibility that a life that has a body like ours exists. I also assume that our mind is in an energy called "soul," and since invisible bodiless spirits exist, it is no mystery if the similar thing exists somewhere in the universe. Thinking this way, it may be appropriate to take that the spirits who left this world saying, "I am going to the world of light," after receiving *Shinkiko*, must become a part of the universe because there is no clear border line between the earth and the universe. And the words left by the spirits, who will be active in the next stage, "I will support and watch others," imply that the spirits will grow more by supporting others. I think that it works like parents-child relationship: a child is cared for by his parents, and the parents spiritually grow by upbringing him. Thus, the two elements grow in their interdependent relationship with each other; and this must be how the system in the universe works in terms of spirituality. So you could say that all creations on earth are in some way supported by something that exists somewhere in the universe.

The High Genki connects the universe and the earth

The *High Genki* apparatus was invented by the late chairman in 1986 guided by the dream he saw. As he used the device, he started saying, “this is a *Shinkiko* transmitter; it attracts the *Shinkiko* energy from the universe.” What he meant was that the *High Genki* was a device that receives the energy sent from the universe. And as it has already been said, when this energy reaches to a spirit who is suffering and is obsessed with his own pain, it allows his spirituality to heighten and enables him to support and watch others. That is, he becomes a little closer to the god. Moreover, the chairman did not produce the *High Genki* on his own will; he was made to do so. Putting all these things together, it seems to me that the great existence in the universe is trying to lead all the people on earth closer to him by making use of the *Shinkiko* energy.

The universe wants to send a lot of light

By the way, whether you are a parent or a teacher, it is natural to hope that your child or student will stand on his feet as soon as possible. If you love him, you will want to devote yourself to do good things for him. But if you teach junior high school level content to a primary school student, he may not only understand it but also may hate it and even stop learning. By leading a student or a child to be aware of things and learn things at the right time in accordance with his growth, parents and teachers can learn things as well. Parents and teachers who are already mature may sometimes feel impatient and irritated at a snail's pace of his progress. I think that the god-like existence in the universe is eager to offer a helping hand to us. But many people cannot be aware of the offer; that is why the universe has distributed a “reference book” or the *High Genki* apparatus in order to lead people in the right

direction.

Due to the demand from the spirits who appeared before me while I was sending *Ki*, I produced the Power Unit in 2000. I feel that this was actually the intention of the universe --- that sends light --- to let people receive more powerful energy and read a better “reference book.” I suspect that the universe is eager to send a lot of light.

Our roles

Why did *High Genki* owners buy a *High Genki*? There must be straightforward reasons: being sick or unwell, wanted something good for their families and etc. When you receive *Shinkiko*, its light gradually reaches and spreads surely not only to your soul but also to your family and the spirits around you. It may be that, the *High Genki* user's ancestors wanted the light, or that the universe was desperate to send the light to them. So, while receiving the light from a *High Genki* and living in line with the guideline of *Senshin*, we all should try to grow from a primary school student to a junior high school student in order to get closer to the god as much as possible. What we need to do first, is to make ourselves vigorous in mind and body, and broaden our views to gradually be able to help others. Working to be in line with the guideline of *Senshin* together with my staff, I myself will not forget to develop high performance *Ki* goods that work like a *Shinkiko* receiver in order to make it possible to receive a more powerful *Shinkiko* energy on earth.
