

Shinkiko A-B-C

Special Feature Commemoration of the 10th anniversary of the SAS Association The SAS Inc. and the membership

Since the last month's issue was featuring the 20th anniversary of this monthly magazine, "Hi Genki," I talked about the history of the SAS Inc. and the change in quality of the Shinkiko energy. In August 1998, our company changed its name and started offering the existing membership, and this month's issue marks the 10th year anniversary. I am really thankful to the members of the SAS Association, who have been avid readers of this magazine and have been supporting SAS Inc. In this month's issue, I will talk about SAS Inc. and the membership.

A company that deals with the energy called Shinkiko

The perception of the nature of Shinkiko energy changed from "Shinkiko energy for the body" to "Shinkiko energy for mind and soul," due to the late chairman's spiritual awakening before he died. We decided to change the name of our company to SAS (Shinkiko Assistance and Support), which represents our wish to encourage people to use Shinkiko energy, in order to make it match the new perception.

We, the SAS Inc., offer the Shinkiko energy, the energy in the universe, through Ki products, seminars and various services and receive money in return for it. So we do not handle goods or products that do not transfer Shinkiko energy nor do we offer services that do not send the energy to people. More than ten years ago, there was a time when there were advertisements of other products, such as foods, that had nothing to do with the Shinkiko energy in this magazine, and also a time when we handled products that were irrelevant to Shinkiko. The reason why we eliminated those things although we were making money with them was because while I was running the company, there was one thing I noticed. From my experience. I learned that handling things that are irrelevant to Shinkiko energy makes the vibrating energy of Shinkiko disperse, and this makes us unable to manufacture products that can transfer a powerful energy. Any objects, more or less, receives a vibrating energy called Ki from people who came into contact with it. Products or goods that were manufactured by someone somewhere are being strongly affected by the thoughts of the developers and the sellers when they developed them and sold them; and their thoughts become invisible Ki, and degrade the purity of Shinkiko energy. So, I thought we should not handle products like department stores and trading companies do. We have the role to pursue a stronger Shinkiko energy, and we should work hard to achieve results in order to be recognized and contribute to society. This is how we receive money and also our reason for being in society.

The payment we receive should be used for advertising Shinkiko energy, with gratitude, to let people know about it, to maintain the company and to encourage the members of the SAS Association understand Shinkiko in order to allow them to make use of the energy continuously for a long time. I am working hard to run the company warning myself that if I do anything inappropriate, the universe will not share the energy anymore.

Effort to make high-performance Ki goods cheaper

So, you can deem that anything we sell offers Shinkiko energy. You can receive Ki not only from Ki goods but also from the Shinkiko Retreat Seminar and other seminars, and by paying the membership fee to be a full member of the SAS Association. Generally, the more expensive Ki goods are, the more powerful Shinkiko energy they transfer, but we are working hard to offer them for a cheaper price. As I said earlier, we should not neglect to make effort to let people receive benefit of Shinkiko energy for a longer period as much as possible. All the Ki goods should be our original in order to avoid influence from the vibrating energies of other companies. So, our products sometimes have to be designed from the scratch. Unlike merchandise that is mass-produced, Ki goods tend to be expensive since they can only be made in small volume. But compared to the old days, due to the increase in the number of Ki goods users, we have managed to keep costs low and offer products for cheaper prices by selecting appropriate materials and ways of making them. We will continue to improve cheap high-performance Ki goods.

The aim of the membership

Ki has a nature that, when a Ki receiver asks for Ki, he can receive more Ki by the attunement of the two vibrating energies. So, the amount of Ki you can receive greatly varies depending on your attitude: if you buy Ki goods on your own will and have a will to receive Ki you can receive more Ki, but if you are forced to receive it, you will receive

less. The membership of the SAS Inc. is called the SAS Association, and to be a full member of it, you will need to pay the annual membership fee. This membership was established in hope that the SAS Inc. can, as much as possible, help the members receive Shinkiko energy without fail throughout the year, understand Shinkiko energy and receive it continuously. If you become a full member, you can enjoy many benefits, such as, use our centers for free; have your Ki goods fixed for a low price; buy Ki goods and participate in seminars at a discount price; subscribe to this monthly magazine and weekly Shinkiko News and so on. The aim of the membership is to let the members take advantage of these benefits and allow them to understand Shinkiko energy better, to tune to the energy properly and to receive a stronger energy.

Future support of the SAS Association

We, the SAS Inc., need to reinforce the support system of the SAS Association since the increase in the number of the members influences the strength of the Shinkiko energy. This monthly magazine, "Hi Genki" has a central role to support the members, so, we will continue to make an effort to make the magazine easier to read. Also, from this spring, we have started offering a free "Shinkiko Video News" on DVD to those who are interested in being a full member with a view to let them easily understand Shinkiko not only with texts but also with pictures. We are going to offer it seasonally and regularly. Also, we are planning to upgrade and expand our service by running Shinkiko lessons in Kiko Experience session and delivering videos for those who live remotely and are unable come to our centers.
