

The High Genki machine transfers Ki sent from the universe

In the course of doing his work using the High Genki, the late chairman started saying, “The High Genki is a Ki transferring machine. The Shinkiko energy comes from the universe and gathers in the machine, and the machine radiates it.” What he meant was, the High Genki is a machine that receives the energy from the universe.

The universe is always sending the energy to us, but its vibrating energy is so different from ours that we cannot tune in to it. The High Genki machine is a transferor which changes the Shinkiko’s vibrating energy to a level which allows us to receive it.

The energy which the High Genki machine transfers not only acts on our body symptoms, but also acts on the paranormal world which we cannot see, and makes a big change in our life.

When this energy reaches our soul, to the core of our life, it purifies our mind which has been full of pain and sorrow, and allows our soul to grow more. Then we will be broad-minded, and considerate of others.
