Easy to Understand Shinkiko Class — by Masato Nakagawa Tuning to the vibrating energy of Shinkiko Vol. 2

In the last month's issue I said that if you receive Ki while being conscious of doing it, you will be able to tune to the new vibrating energy of Shinkiko and to absorb the energy more and that the main thing was to be conscious of receiving it. This time, I am going to talk mainly about what sort of things you are likely to miss out in your daily life, in order to absorb Shinkiko better.

It is not only Ki goods that transfer the vibrating energy of Shinkiko

In the last month's issue, I said that Shinkiko energy comes from the universe and High Genki and Ki goods that work like a transmitter attract the energy; and that if you receive Ki from them while being conscious that you are tuning to the new vibrating energy of Shinkiko, you will be able to absorb it more. Especially, if you be conscious of anything related to Shinkiko such as, this monthly magazine "Hi Genki," each Shinkiko center, the Shinkiko Retreat Seminar and the chairman's Shinkiko session, you will be able to absorb the energy more. I will explain in detail about the things you are likely to miss out in doing it.

Making use of the monthly magazine "Hi Genki"

You can receive Ki either by holding ordinary Ki

goods, putting them somewhere or using them. This monthly magazine, "Hi Genki" is also one of the Ki goods which you can receive Ki by reading and looking at it. The reason why it is published monthly is because Shinkiko energy is gradually becoming more powerful. So, the amount and the quality of energy being emitted differs between the older issues of "Hi Genki" and the newer issues. I suggest that you always tune to the newest issue while you read it; it will not be the same as when you read a normal magazine or book. Even if you do not normally read, just take the magazine in your hand and be conscious that you will receive and tune to Ki while you look at it. It all depends on the "switch" in your mind. Please remember that a slight change in your mind affects the amount of Ki you can absorb.

Your attitude counts when visiting a center

The space of all the SAS Shinkiko centers located across the country transfers Shinkiko energy. Due to the synergistic effect of the space and the Ki goods and High Genki apparatuses provided at each center, you can receive more powerful Ki. So you can receive Ki by just being at a center, but the amount of Ki you can absorb will depend on whether you can be conscious of Ki. For example, you use a center as a meeting spot to meet your friends. You go to a center since it is an appropriate spot to meet him or her, without thinking about Ki; you have enough time until the appointed time, so you receive Ki. You will easily be able to absorb

the energy, especially the vibrating energy of improved Ki, if you are conscious of it; but without being conscious, you will not. Anyone would think that the Shinkiko centers that are filled with positive Ki are more appropriate for a meeting spot than other places with negative Ki. But with a slight change in your attitude towards Ki, the amount of Ki you can absorb differs greatly. At each center, various events are often held in order to let customers make use of positive Ki. If you are going to participate, please focus and be conscious of receiving Ki.

Also, by making use of the energy that gathers at each center, we have started a service to remotely send Shinkiko energy to customers. Please contact your nearest center; it is much easier to apply for it than to apply for Shinkiko demonstration offered during a chairman's session and the four-day intensive Shinkiko session. I have said that the Shinkiko energy is changing day by day. So I suggest that you make use of our centers constantly, once a week or month, in order to be able to tune to the energy easier.

Making use of Shinkiko Retreat Seminar

Shinkiko Retreat Seminar is also one of the things that attracts Shinkiko energy. We have made use of many Ki goods in order to make the seminar full of good positive Ki, but it is not the "place" that attracts Ki. As I said before, even if the venue of the seminar changes, you can receive a strong Shinkiko energy. We owe it to the support from the spirits who had some kind of connection with the seminar. Their light that supports us does not stay in one place; it keeps in touch with the seminar itself. So if you be conscious of the seminar, you can receive Ki. Those who cannot afford time to participate in the seminar become able to gradually receive Ki and may get away with troubles, if they really think they want to participate. Some people sometimes experience favorable turn reactions the minute

they pay the fee and start receiving a strong Ki. So, I suggest that you be conscious of Ki immediately and decide to participate.

You can also receive Ki even after you left the place where the seminar was held by recalling the seminar. Making use of a leaflet on "*gyou*," (literally means training) which is given out during the seminar, a certificate that certifies you as a Shinkiko energy transferer and a certificate of completion for the seminar will also help you to be conscious of Ki.

The Shinkiko Retreat Seminar is held once a month, and as a consequence, this is gradually improving the vibrating energy of Shinkiko. To get used to tuning to the evolving energy, I suggest that you constantly participate in the seminar.

Making use of chairman, Masato Nakagawa

Like various Ki goods and the centers, I, the chairman of SAS, Masato Nakagawa seem to attract light. Thanks to many spirits who recognize me as the one who maintains and spreads Shinkiko, I am getting so much invisible support. I feel so grateful for them. I am always working hard to devote myself to live up to their expectations without slacking off. That is why I run chairman's sessions, seminars and Shinkiko lessons in order to let participants make use of the energy that comes to me. In sessions at centers and in Shinkiko Retreat Seminar, the light attracted to each participant combines with other light and brings about a synergistic effect. The effect will be greater if you bring along your High Genki and Ki goods and use them in seminars and sessions. You can also receive Ki by just talking to me face to face. Please feel free to take advantage of these things.
