## Special Feature

### Commemoration of the 20th anniversary of the monthly magazine, "Hi Genki"

### The history of the SAS Inc. and the change in quality of Shinkiko energy

The late chairman started Shinkiko when he launched the *High Genki* apparatus in 1986. After that, many seemingly bad things happened to him, the SAS Inc. and myself, and in overcoming them, I realized that they had a certain direction. I could feel the intention of the universe, which is sending Shinkiko energy to us. In this special feature, let us look over the history of the SAS Inc. and the change in quality of the Shinkiko energy.

### The late chairman and the energy of awakening

The late chairman, who had become able to emit Ki from his hands in 1988, treated many patients by using the energy and the *High Genki* apparatus. But he collapsed from cerebral hemorrhage in March 1995. And later, he announced that that was when he became aware that the idea of "removing diseases from patients' bodies with Ki" was wrong. He was explaining in his seminars that seemingly bad things happen for the sake of bringing spiritual awakening to people and he himself recovered from his sickness by the awakening. That is, he newly found out that spiritual awakening makes souls and spirits grow and shine brighter, and that the Shinkiko energy encourages it. Sending Ki to someone is making the soul of the Ki receiver shine; and its light reaches to the negative Ki, which have been

attracted to him, and the Ki naturally goes away. This idea was totally different from the conventional idea of forcibly getting rid of negative Ki.

### The change in quality of the vibrating energy after the late chairman's death

The late chairman died straight after he found out that Shinkiko energy encourages people to spiritually awaken and brighten our souls and spirits. After his death, my mission as the new chairman was to make those who understood the conventional Shinkiko, that is, the people who wanted to get well by just getting rid of their diseases, understand the nature of Shinkiko which my father later became aware of. The vibrating energies from both Ki senders and receivers and also the SAS' staff, who provide the energy, sympathize when all of them understand the nature of the Shinkiko energy well, and the energy becomes much stronger. If their levels of understanding vary, the vibrating energies will discord and disharmonize, making the overall energy weak. That is why I have been explaining the importance of receiving Shinkiko and making your souls shine in a proactive manner. Also, I organized the SAS Shinkiko Association and started offering the full membership in 1998, because I believed that by gathering people who are active in practicing Shinkiko, the vibrating energy of Shinkiko would rapidly improve in quality. I have been working hard to let people know what the Shinkiko energy is like, through this magazine, weekly Shinkiko news, Shinkiko Retreat Seminars and

workshops as much as I could.

### **The development of the Power Unit in 2000, and the permeability of the vibrating energy**

Although I was not good enough, thanks to the people who understood the Shinkiko and who supported me, the vibrating energy of Shinkiko gradually became stronger. And five years after the death of the late chairman, at the end of 2000, there was a big change. The Power Unit, which fits inside the *High Genki* applicator and makes the vibrating energy of Shinkiko from the applicator much stronger, was developed in that year. This unit allows the vibrating energy to permeate much deeper into a soul at a stroke. Our souls are connected with the people around us and also with our remote relatives; and the Power Unit enabled the Shinkiko energy to reach not only Ki receivers but also the spirits who are connected to them, one after the other. That is, the apparatus became able to send light not only to a Ki receiver but also to his families and ancestors.

After that, a more powerful Power Unit was developed and the amount of light from the vibrating energy of Shinkiko increased. As I talked about it in the last issue, the source of the Shinkiko energy in the universe became able to send light to the earth all the more.

### **Closing of the Shinkiko Retreat Seminar Center in Ikoma, and energy in the universe**

It is not only the SAS Inc. who uses an invisible energy on earth. Since the dawn of time, many religious association and various organizations have been using “invisible energies” (they are all similar to Ki but differ slightly) and the energies have been used in various healings and treatments. It seems that there was a time when curse or negative Ki was used in struggle for power and scramble for political power. All of these energies have different sources and differ in strength and effect. As the

late chairman was saying from the beginning that “Shinkiko is light from the universe,” the source of Shinkiko exists in a far distant universe. It is not something that is related to any organizations or religious gods; it is a unique source exists in a higher dimension.

In May 1994, we opened the Shinkiko Retreat Seminar Center in Ikoma, Nara, but had to close it in 2006 due to the aging of the facilities. I came to think that a sacred mountain, Mt. Ikoma, where asceticism was practiced, had too long a history and it worked like “noise” ; and the noise made us difficult to receive a purer vibrating energy of Shinkiko. I took this occasion to run the seminar across the country, mainly around the Tokyo area. Just like primary colors look much brighter on their own, I thought receiving only a pure Shinkiko energy as much as possible would allow us to tune to the vibrating energy of the universe more properly. I will run the Shinkiko Retreat Seminar in Okayama in April 2008, and in Kumamoto in June in the same year. These times may again be a turning point for the Shinkiko energy.

### **The development of the white ceramic head, and a new vibrating energy**

I managed to develop the white ceramic head, which was launched at the end of the last year, because I had become able to tune more to the vibrating energy from the universe. Vibrating energy from a higher dimension is added to the vibrating energy which is transferred by the existing Ki goods including the *High Genki* head. If you can tune to this energy, you will be able to receive an enormous amount of energy at a stroke. There is also a possibility that the way of receiving and sending Shinkiko energy may change drastically. From now, more things about Shinkiko energy may be clear; it seems to me that it has finally reached a new step.
