

# Shinkiko A=B=C

しんきこう えいびいし

## Easy to Understand Shinkiko Class

The Personal HG will be available to non full members. In the last issue (June issue), I talked about the universe, the source of Shinkiko energy. Based on that, I will talk about the current situation of our society in desperate need of Shinkiko energy and what I expect from the effect of the Personal HG in detail.

## Deterioration of global environment in terms of intangible Ki

When the late chairman was still alive, he said that, "Shinkiko energy is not for curing disease. Its real aim is to purify our environment and let all the living things live in a good energy...", and these words are contained in the Shinkiko video which is always being played in the background at each center.

In July, a summit on global warming was held in Japan, in which the discussion was led by advanced countries. Global environment is growing steadily worse. Due to the increase in the amount of CO<sub>2</sub>, the temperature of the earth is rising; and at the same time, the Ki around the earth is getting worse as well. The "environment" that the late chairman mentioned, was about this "Ki environment." The deterioration of the Ki environment is caused by the spirits who lost light and they are weighing heavily on all of humanity. And people's mind and body are both affected by them and are changing for the worse. Spirits come from the universe, obtain physical bodies and born into this world; and go back to the world of light or the universe again after

ending their lives. But now there are many spirits who are deprived of their light by negative-minded spirits and are unable to go back to the world of light; and they stay on the earth. Normally, spirits enter the world with a stronger light, but due to the declining birthrate in Japan, more negative-minded spirits weigh on new lives than before, and the light of new lives are being ruined. Such vicious circle not only makes the vibrating energy of the earth heavier, but also ruins the balance of the universe. That is why various existences in the universe, such as, the source of the Shinkiko, are each trying to help us in different ways.

## The powerful light, Shinkiko

Usually, people heighten their spiritual energy by spiritual awakening, and increase the amount of light of their souls; and their light is shared by the souls or spirits around them. Anyone who has his physical body is doing this, including those who do not know about Shinkiko. But these days, there are so many spirits who are negative-minded and who lost light that we cannot absorb enough light if we are passive about it.

When we are strongly affected by negative-minded spirits, we become obsessed with fulfilling our desires. It may work to make our lives materially rich, but we will have less chances of enlightenment and there will be less inventions and discoveries that improve global environment, and also science will not improve. Not only in the field of science but also in other fields, such as politics and economy, there will be a sense of stagnation

and the world will become chaotic.

Positive Ki is what makes us feel peaceful. There are many positive Kis or lights around us, such as music, art and religious. These positive Kis and Shinkiko energy are similar in that they are all intangible energies, but the Shinkiko energy is incomparably greater than other energies. Shinkiko strongly pours light into souls and spirits, and brings spiritual awakening to people; and this unprecedented, foreign and powerful energy is needed in this era.

### Many relay stations are needed

On the earth, there are several relay stations that transfer Shinkiko energy. They are dotted about, like small lights, on the earth that is darkened by negative Ki, and these are where *High Genki* apparatuses exist. And a light of circle, which is invisible, is created by *High Genki* users' families, friends and ancestors, centering on each *High Genki* user.

In the July 2004 issue of this magazine, I explained about the Personal HG. It works effectively when *High Genki* users want to gather the energy more intensively to themselves. This product had only been available to the full members of the SAS Association, but because we live in an age where many “relay stations” are needed and because the amount of energy that the product can transfer has increased enough, it will be available to non full members as well. The Personal HG serves as an attaché-case like body of the *High Genki* apparatus, but please keep in mind that the energy emitted from a Personal HG is only sent intensively to the one whose name is written on the “power sheet” of a Personal HG. Just like the benefits of a full member, such as using each center for free, are only available to a full member him or herself. If you want to send the light to your whole family, including your grand children or grand parents, I suggest you use the conventional *High Genki* apparatus. The Personal HG can be connected to

other kinds of heads except for the Mini Stick Head. So, if you buy both the *High Genki* applicator and the Personal HG, you can have them cheaper than buying a standard *High Genki* apparatus. If you cannot afford a standard *High Genki* apparatus, this may be a good option in order to reasonably receive Ki.

### The Personal HG will come in two types

With the release of the Personal HG to non full members, it will be sold in two types: the conventional rechargeable type and the non rechargeable type. A “mode selector switch” has been newly installed on the conventional type: you can choose either rechargeable mode or power supply mode. The white ceramic head that uses a lot of electricity will only last for half an hour in the rechargeable mode; so switching to power supply mode is recommended. Also, the non rechargeable type does not run on batteries and accordingly it is cheaper. Please choose whichever meets your needs. (These two types of Personal HG will be released in late August.)
