

## **The light of support sent from the universe**

I believe that the entity of light of the grand universe is desperate to give a helping hand to us on earth.

Any parent or teacher would want his or her child or student to be full-fledged as soon as possible. If they love the child or student, they would be willing to give up everything to help them. But if you force an elementary school student to learn what is to be learned in junior high school, the student would not understand it. Moreover, the student may get tired and stop studying.

Making an effort to encourage a child to learn at the right time, according to the stage of his or her growth, and leading them along the way, is what a parent or a teacher must learn. For a parent or a teacher who is watching over the child from a higher level, the progress is so slow at times that they might become irritated and annoyed.

However, because the actual situation is that the receiver of the help is looking somewhere else, not at the offered hand, I believe that the universe strategically informed us of the existence of the Shinkiko energy, and distributed the High Genki as a guide book to make us look in the right direction. Each one of us on earth is receiving, from someone, the light that exists in the universe, which has the power to let our souls live and shine. The fact that we have enough Shinkiko energy to allow us to provide the light to more souls is the will of the universe. To understand this and then receive the Shinkiko energy is the best way to tune in to the vibration of the Shinkiko energy and receive it effectively.

One more thing I want to mention here is a quote from the late chairman; “Believe in God and love people.” As he said and I agree, there is some kind of tremendous entity that created this world and us human beings in this grand universe, and constantly leads human beings toward the magnificent harmony on a universal level.

On this earth, an immature planet, there have been a lot of mistakes and we should recognize and learn from them to further evolve. I believe that the grand entity that we call “God” is waiting for the evolution of the earth and the soul of each human being.
